CivDot+

LAYOUT EVERYTHING YOU BUILD

EXTREME PRECISION & OUTPUT

- Mark up to 1,200 points a day with 1 operator.
- 3/100' (8mm) accuracy with a laser pointer.
- Two LiPo battery for a full day of work.

DUAL RTK RECEIVER

- Dual-antenna GPS-based heading.
- Industrial grade IMU for tilt compensation.
- Connect to any local base station or NTRIP.
- Follows GPS, GLONASS, Galileo, BeiDou.

DURABLE & VERSATILE

- Fully weatherproof.
- 10" of ground clearance.
- Works well even in uneven terrains.

LEARN MORE: civrobotics.com

Ideal tool for construction **projects with tight tolerance.**

No surveying experience required.

Supports **CSV / DXF files.**

Generates detailed **reports with topo.**

CIV ROBOTICS

STRIPE WITH CONFIDENCE

LAYOUT 16 MI (25KM) PER DAY

- 8 hour battery life.
- Mark points, dashes and solid lines.
- Layout at 2.5'/sec (0.75m/sec).

DUAL RTK RECEIVER

- Sub-inch (2 cm) level precision.
- Dual-antenna GPS-based heading.
- IMU sensor for tilt compensation.
- Connect to any local base station or NTRIP.
- Follows GPS, GLONASS, Galileo, BeiDou.

LIGHT AND COMPACT

- Weighs 35 lbs and fits in any vehicle.
- Carry 2 extra spray cans.
- Remote operation from safety truck.
